DETAILED ACTION

Response to Amendment

1. The amendment filed 10/20/05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

(a) **New Claim limitation "U turn capability"**. There is no indication of a U turn capability/method in the original specification.

(b) **New Drawing figures 3-6,8,9A-10DD**. There is no indication of any mention of details such as "concrete, plumbing, electrical, being parts of material in the original disclosure. There is also no mention of new detailed structure of cards in the original disclosure. There is also no reference of a newly introduced writing implement (112 as shown in Fig.8) in original disclosure. A mere mention of the game being associated with terminology such as contract/construction bidding does not automatically mean plumbing/concrete/electrical/writing implement.

(c) **Amended specification** includes terminology not present in original disclosure, for example: "concrete, plumbing, electrical

Applicant is required to cancel the new matter in the reply to this Office Action.

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction

Art Unit: 3711

of the following is required: **Claim limitation “strategically dividing a dice roll” is inconsistent with the disclosure page 4, line 4 which restricts splitting a dice roll.**

Claim Rejections - 35 USC § 112

3. Regarding claim 1, the phrase **"such as"** renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

4. Claim 1 provides for the use of “U turn structure”, “playing cards”, “bid boards”, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 1 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

5. Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

“fulfilling contracts” (?) has no clear meaning of what is tangibly happening in the game.

Claim Rejections - 35 USC § 103

6. Claim 1 rejected under 35 U.S.C. 103(a) as being unpatentable over Hall (4386778) in view of Whitney (5456473) and Stevens (4411432).

Hall teaches a game board (Fig.1) providing a set of dice (21), playing cards Fig.6-7), game money (2:50), parts representing materials (3:3:7-9), bid boards (Fig.5) with dollar amounts and further engaging in bidding process (3:20-63).

Hall teaches all limitations except that it does not provide miniature trucks for vehicles.

Whitney teaches miniature trucks (40,50) for use in a construction method game.

The art area of board games is a highly competitive amusement area. One way to make the game attractive is to provide miniature simulated articles similar to real situations for making the game look real. In order to make a construction bidding game it would have been obvious to provide miniature vehicles such as provided by Whitney. One of ordinary skill in art at the time the invention was made would have suggested providing miniature simulated trucks to simulate transporting simulated materials during construction management game to make the game real.

Hall teaches all limitations except that it does not each splitting a dice roll to move more than one piece. Stevens teaches splitting dice roll and moving more than one piece to a combined total (4:54-58). Examiner notes that there is no criticality of this method step with respect to a bidding game. Examiner also notes that such method steps are commonly known in the game board art area and used for enhancing the amusement value of the game.

One of ordinary skill in art at the time the invention was made would have suggested including such commonly known steps for making the game attractive.

Response to Arguments

7. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
